

## Press Release- 2010 Accents of Distinction

**For Immediate release**

**Mississauga, ON, January 25, 2010**

*Accents of Distinction*, a leading custom stone and tile fabrication business is pleased to announce the introduction of two new products to their innovative line of Residential and Commercial product lines- Custom StoneVents & ReSerts.

The custom *StoneVents* are a one of a kind product in North America, allowing home owners the ability to truly finish their floor in a seamless and high quality manner.

Fabricated from premium stone (granite, marble, or porcelain) the *StoneVents* will match any tile project being considered and provide a smooth transition in balancing any tile or stone flooring project.

Standard sizes are 3"x 10" or 4" x 10", with custom sizes available

Imagine a floor with air vents that seemingly disappear.

The **Accents of Distinction** *ReSert* line is a specially designed tile that can be rotated on any kitchen back-splash throughout the year with an assortment of seasonal and special home designs.

This is achieved through a unique magnetized template on the back of the tile.

You have the ability to change or rotate the design of your backsplash and the selection of designs that will match your décor include seasonal design inserts, Christmas themed, Valentine designs, Easter, and Halloween icons.

Our special home designs include flowers, herbs, fruits, martini glasses, coffee, and many more.

Create a different thematic design in your kitchen throughout the year, and celebrate holiday occasions in style.

Standard size is 4"x 4"

**Accents of Distinction** (a manufacturing division of DGM Enterprises) is based in Mississauga, Ontario, Canada and has been producing premium and innovative custom stone, tile and artisan pieces utilizing computerized waterjet cutting, for over 20 years.

From stone medallions, backsplashes, and borders, *Accents of Distinction* has the ability to not only provide exemplary designs and products, but also the expertise to solve many different construction and substrate materials issues.
